

Our components

✓ Landscape Governance

We successfully developed 01 Integrated Climate Smart Landscape Plan for Lac Duong District, integrating NDC targets into 01 Provincial Planning 2030.

✓ Monitoring and Traceability Systems

We developed a traceability system with real-time satellite-based forest monitoring, provided 250,000 QR code stamps for 15 agricultural production enterprises in the system, and facilitated the procurement of drones for high-tech forest monitoring.

✓ Supporting Smallholder Farmers

We enabled the adoption of sustainable upland agroforestry systems by over 3,355 farm households.

✓ Knowledge Sharing

We published articles on deforestation free value chains, forest enhancement models and developed the National Sustainability Curricula for Arabica coffee. Promoting public-private-producer-partnership across Viet Nam, Asia Pacific Region and at COP27.

✓ Mobilization of Finance

We have secured €1,086,859 in public and private finance to date, dedicated to climate landscape restoration and unblocked €80,000 funds to support 05 micro and small businesses in Lac Duong.

Advancing REDD+ through CAFÉ-REDD+

About Us

The Cooperation from PPPs against deforestation in Viet Nam (CAFÉ-REDD) will reduce deforestation and forest degradation by addressing the conversion of forest to agriculture in a priority conservation landscape – The Lang Biang landscape (comprising Bi Doup Nui Ba National Park and Buffer Zone).

CAFÉ-REDD is funded by The International Climate Initiative (IKI) - The German Ministry for the Environment, Nature Conservation, Nuclear Safety, and Consumer Protection (BMUV) and will run from 2018 to 2024, with the total funding budget of approximately EUR 2.8 million.

Duration
11/2018 - 04/2024

Location
Lac Duong district
Lam Dong province, Viet Nam

SNV

against deforestation in Viet Nam

A digital monitoring and traceability system

Including a satellite-based forest monitoring tool, a coffee farm database, and a digital traceability tool, to ensure deforestation-free coffee value chain and enable consumer verification of coffee origins.

The International Climate Initiative is one of the key instruments of the German Federal Government to support international climate action and biodiversity. The IKI supports solution strategies in developing and emerging countries that seek to achieve sustainable change.

SNV is a global not-for-profit organization committed to sustainable development and poverty alleviation. With over 1,600 team members, including many from the communities we serve, we operate in 20+ countries across Africa and Asia. In Vietnam, our successful projects, dating back to 1995 and including IKI funding, reflect our expertise in adapting solutions in agriculture, energy, and WASH to local contexts for tangible community improvements.
